Education

Feb 2017 - Dec 2018:   **Master of Data Science**

Monash University, Caulfield Campus
- Under the International Merit Scholarship
- Research Thesis: Medical Multimodal Classification and Detection Under Small Data Conditions
- Graduated, WAM: 81.313/GPA: 3.625, H1 High Honours

Jan 2018 - Feb 2018:   **Statistical Machine Learning**

Australian Mathematical Sciences Institute

Dec 2016:   **Bachelor of Science, Mechanical Engineering**

Bilkent University - Ankara, Turkey

Skills Summary

Technical Skills:

- Proficient in : Python, R, TensorFlow, PyTorch, Natural Language Processing, Deep Neural Network Architecture Design, Micro controller Programming (mostly worked with PIC), C ++, SQL, High Distinguished in Data Structures and Algorithms, MATLAB, Linux Shell, Tableau, Hadoop, Scala, Spark, SolidWorks

Project Management:

- Strong capacity to conduct independent research and strong analytic skills
    - Conducted research in order to produce a thesis which was awarded 'high distinguished research' from Monash University.
- Strong organisational skills and objective control
    - Demonstrated through founding of a company (BMT) and making it a success.
- Tenacity to work
    - Proven through not leaving the musical theatre industry for 7 years.

Communication / Teamwork

- Excelling in group environments.
  - Proven via successfully working on two industry projects with a team of engineers at Roketsan and UMS.
- Clearly demonstrated expert communication and teamwork.
  - Working in the musical theatre industry for 7 years who's success is heavily dependent on communication and teamwork.
- Competent in taking initiative and leading a team.
  - Proven through founding a Musical Theatre Company and leading over 90 people for two years.

Employment History

Jan 2019 - Ongoing: **Big Data & AI Engineer (Full Time)**
Telstra
Responsibilities
NLP - ChatBot Modelling and Evaluation Modelling

Feb 2018 – Jan 2019:   **Data Scientist Grad (Part Time)**
BlueRock
Responsibilities
- Working under BlueRock Intelligence Department
- Predictive Modelling, Multivariate, Multi-seasonal Time Series
- Advanced Geospatial Analytics, Machine Learning and Deep Learning business solutions for clients

Jun 2016 – Dec 2016:   **Engineer, 6 month (Full Time)**
UMS Centre
Responsibilities
- CAD design contribution to the design team to develop a $700 000 production line machine.
- Was able to experience the production cycle with experienced engineers.

Feb 2015 – Jun 2016:   **R&D Control Engineer (Part Time)**
ROKETSAN, Ankara
Responsibilities
- ROKETSAN is one of the biggest defence systems company in Turkey, specialising in missile design.
- Contributed to Roketsan's SMART WINGS project's avionic control division.

- - SMART WINGS are long range missile wings that adapt to the surroundings and change shape in order to save fuel and better accuracy
- Programmed microprocessors, (C ++)
- Engineering System Modeling (MATLAB, COMSOL)

Achievements
- Received a 10 000 TL grant from TUBITAK (The Scientific and Technological Research Council of Turkey) for my research.
- Received a $ 25 000 grant for SMART WING research from Roketsan

Jan 2011 – Sep 2014: **Musical Theatre Vocalist, Orchestra Member**

Company Musical Theatre, Ankara

Responsibilities
- Worked as a Vocalist performer for 5 Broadway musicals (over 60 shows).
- Worked as an Orchestra Member (Synthesizer) in one Broadway Musical (over 10 shows).
